Located in the foothills of the Swiss Alps, La Colline Research Laboratories has built a reputation for its technical skills in oxygenation and cell renewal. Its development conforms to stringent requirements and great accuracy, with the exclusive CMAge® as the key element. As the secret to well-moisturized, protected, glowing skin, it is the very essence of La Colline beauty care.

As the ultimate lightening, anti-aging treatment in the **Cell White** line, **White Regenerating Collagen Mask** combines its core formula with the power of collagen:

- Stabilized Vitamin C: Leverages its anti-oxidant power to tackle hyperpigmentation.
- LUX-Factor: A soya-cress combination. These two natural extracts provide dual anti-spot action.

Together, they correct pigmentation spots by curbing the production of:

- Melanin and lipofuscin (pigments responsible for skin tone)
- Tyrosine kinase (an enzyme that contributes to the appearance of age spots)
- An AHA duo (lemon and grapefruit extracts): Combined, these fruits acids help to exfoliate the skin, removing dead cells and fostering skin renewal.
- CMAge®: La Colline's signature complex which activates vital cell functions: Moisturizing, oxygenation and protection to preserve a youthful appearance.

By combining the art of complex formulation with distinct manufacturing process, this anti-aging, lightening 2-step program delivers visible, immediate and long-lasting results:

### **Step 1: White Regenerating Collagen Mask**

Thanks to its composition, based on a sheet of collagen whose biomatrix forms a three-dimensional fibrous network similar to that of the skin, this mask works in perfect osmosis with the epidermis. The solution infused in the collagen tissue delivers its regenerating and lightening power to the skin: Lux-Factor and Vitamin C treat dark spots, the collagen boosts the skin's elasticity while CMAge® activates cellular metabolism. Supple and luminous, the skin radiates with a healthy glow.

### **Step 2: Cellular Post Treatment**

This skin-firming serum lightens and improves luminosity of the complexion thanks to its formula composed of CMAge® and concentrated in LUX-Factor, completed by a toning agent to improve firmness.

This cocktail of active ingredients provides a new highlighting effect to the complexion.

Smoothed, lightened and well-toned, the skin glows with beauty.

The skin looks radiant, even, well-rested and younger, with an instant and long-lasting effect.

### **Instructions**

Tear open the envelope and take out the sheet of **White Regenerating Collagen Mask**. For about 30 minutes, apply the non-woven, gel-coated side to the cleansed face, fitting it in accordance with the holes provided for the eyes and the mouth. Be sure to maintain direct contact between the face and the mask. After removing the mask, dab one dose of **Cellular Post-Treatment** all over the face, neck and décolleté. For an intense and long-lasting result, apply the treatment, once a week for five weeks. For an immediate "radiance-boosting" effect, apply the treatment as soon as the skin shows signs of fatigue.

**We at La Colline Laboratories thank you for the confidence you have shown in us. To find out more about the performances of the products that are best for your skin, feel free to ask your La Colline beauty consultant for advice.**
